

CREEP FEEDING

**ADVANTAGE
FEEDERS**

RUMEN DEVELOPMENT

- Increase growth rates
- Earlier conversion of pasture
- Reduce overall feed needed

THE STARTING POINT – AN INEFFECTIVE RUMEN

- Pre-ruminant
- Pink and smooth
- Sterile – no microbes
- Little absorption capability

Ref: Penn State University

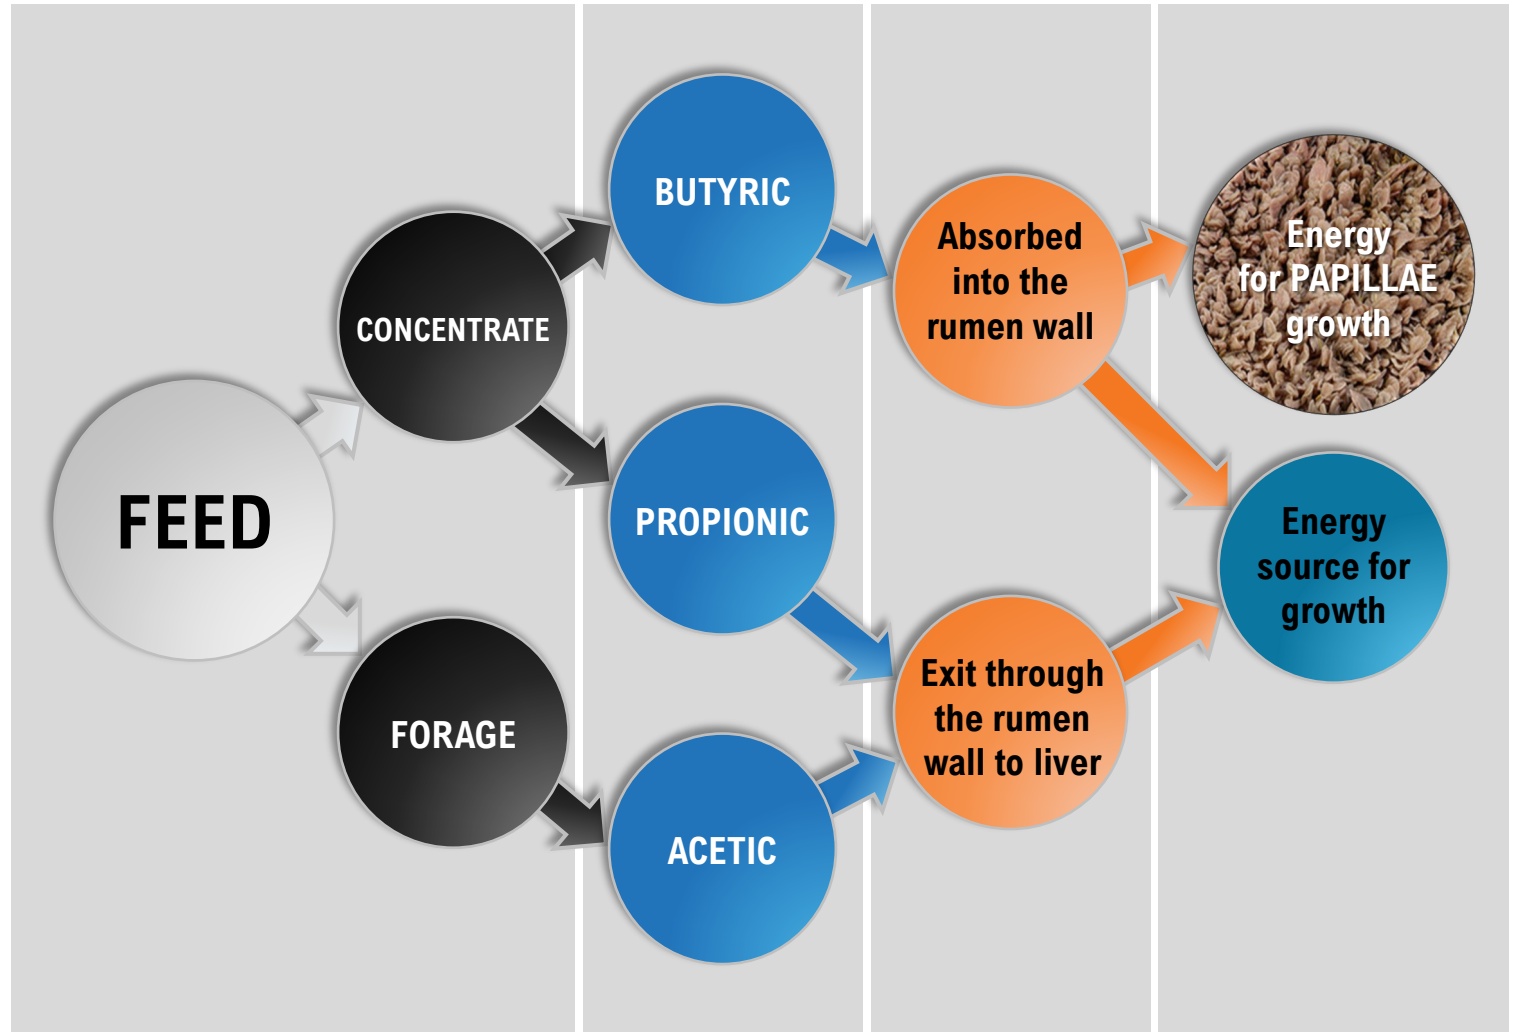

THE GOAL – AN EFFECTIVE RUMEN

- Brown and “shaggy”
- Plentiful rumen papillae
- Large surface area makes high absorption ability

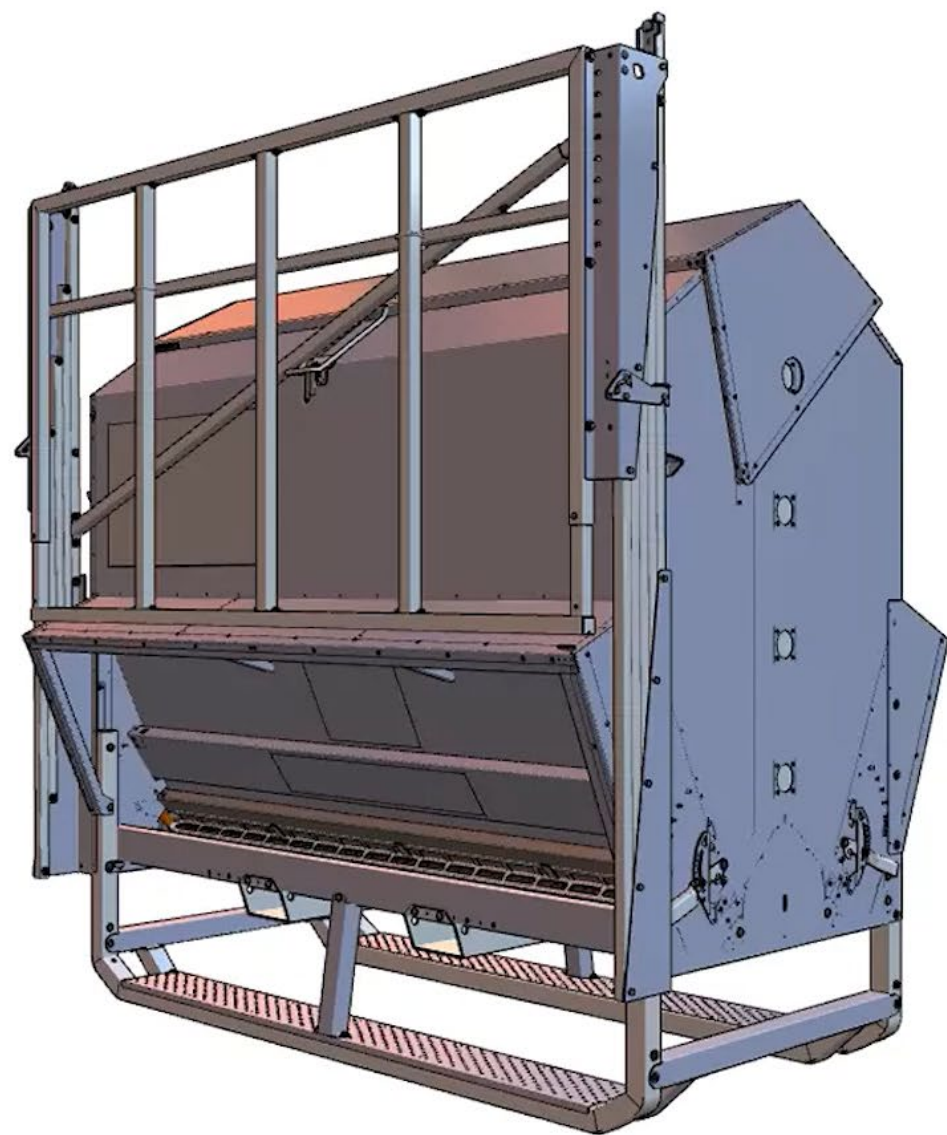

Ref: Penn State University

YOU CONTROL THE PACE OF RUMEN DEVELOPMENT

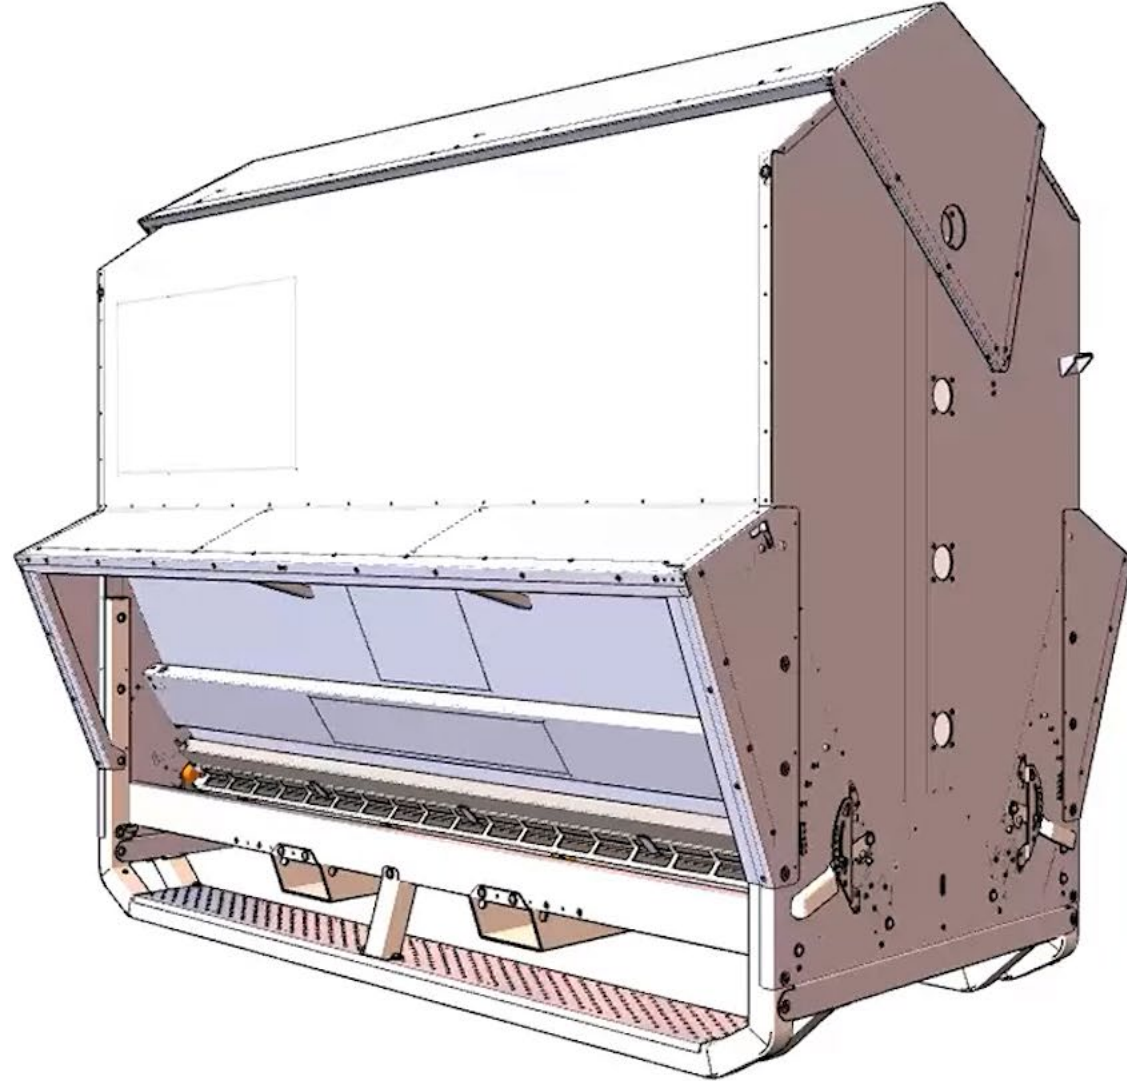

3800^H
Advantage Feeders

SUCCESSFUL IMPLEMENTATION

- When to start
- Training young lambs and calves
- Feeding the most profitable quantity
- Setting the Creep Panels & Gates
- Using Lift Assist Bands
- Selecting the right feed
- Correct stock per feeder
